Classroom Snapshots: Anatomy and Physiology

All high school science courses at PCS are taught at the honors level and include a variety of labs that provide in-depth, hands-on learning experiences for our students. Our tenth grade students recently conducted a dissection lab for Mr. Eiff's Anatomy and Physiology course. Using sheep hearts, the students learned how to identify the four chambers of the heart and how blood enters and exits the organ.

Basketball State Championship

Our Middle School Boys' basketball team captured the CSAA State Championship on Friday after a decisive 57-23 victory. The fans brought an infectious energy to the gymnasium as they cheered on the players, and the boys fought hard for the title. They finished the season undefeated with an impressive 17-0 record. Each one of our five teams showed tremendous effort and improvement this year, but, more importantly, our athletes grew in character both on and off the court. Go, Paladins!

Literary Celebrations

As classes complete a book of literature, they will often have the opportunity to bring to life some of the components of the novel. Fourth grade finished reading *Heidi* and celebrated by meeting goats, like those with Heidi on the Swiss Alps. Sixth grade read *Anne of Green Gables* and attended a tea party with elements inspired by Anne and those in Avonlea. Through the novels in our curriculum, we seek to develop in our students an appreciation for great literature and the life lessons found therein.

Message from the Head of School

This month we held our *Forward Focused 2023* event for friends and families of PCS. We discussed our classical Christian approach and how it makes PCS distinct. With an emphasis on mastery and retention of the best content ever produced by Western Civilization, we develop students who have learned how to learn. Coupled with the loving community environment our school has fostered, this sets us apart from all other schools in our area. We also cast a vision for the impact PCS can make in our community and our nation as we train up the next generation. In order to accomplish all we envision and to accommodate the applications already received for next year, we will need additional space. To that end, we announced the formation of the new PCS Facilities Committee. Please pray specifically for this committee and for God to provide the right people and resources to help us establish a permanent PCS campus.

UPCOMING EVENTS:

March 3 - Join us at Hope Fellowship for the annual Student-Faculty basketball game and Homecoming! Doors open at 5pm for dinner and concessions, and the game will begin at 6pm.
